Sources: *Renault annual management reports*. Notes: (1) Exports include vehicles that have been entirely broken down into kits of parts (CKD basis) with the exception of « small series » corresponding to vehicle « manufactured abroad ». Starting in 1997 Renault no longer published its export statistics, just information on vehicles that have been assembled in France or abroad, regardless of the parts' origins. (2) Staff numbers are as of 31 December of the year concerned, including employees on temporary contracts. (3) Turnover, net income and investments are in millions of French francs. Turnover is net of taxes from 1971 onwards. (4) Workforce, turnover and net income in France and investments are for the RNUR (Régie Nationale des Usines Renault) and then for Renault,SA.
